

Senior Software Engineer

- San Diego
- Full Time

Job Description

Leadfusion is looking for a senior Software Engineer to build our new products as well as enhance the current platform. Join the growing team as we scale our platform. You will play an instrumental role to help evolve our architecture by building on great Open Source technologies like Kafka, Cassandra, Spring Boot, Hibernate, etc.

What we're Looking For

- You are curious and passionate about the architecture, quality, and performance of the platform and products
- You are experienced in building highly scalable, resilient services
- You constantly incorporate new technologies and methodologies to improve the platform
- You have at least five years of Java Applications Development experience

Required Skills:

- Java/Java EE
- Spring Framework
- REST API Development with Spring Boot
- Java-ORM technology including Hibernate
- JMS
- SQL & PL/SQL
- SOA
- JSON
- Git
- Knowledge of HTML5

Desired Skills:

- Full-Stack experience a plus
- Expertise in AngularJS
- Single Page Application Development
- Application development with Scala language
- OSGi
- Kafka/RabbitMQ
- Experience with Cassandra or any other NoSQL Database

Qualifications

- Bachelor's Degree or higher
- Software Engineering: 5+ years
- Java: 5+ years
- REST Service Development: 5 years

Our Tech Stack:

Back-End: Java, Spring Boot and Hibernate

Data: Redis, Kafka, Cassandra, Tableau

Infrastructure: Git, Jenkins, Gradle, Ansible, Linux, Tomcat

Front-End: Angular JS, JQuery, HTML 5 (Nice to have)

Apply by sending an email along with your resume to jobs@leadfusion.com.
