

Web UI/UX Specialist

- San Diego
- Full Time

Job Description

We are looking for a Web UI/UX Specialist that will work with internal and external clients to configure, customize and integrate Leadfusion's SaaS products and solutions for customer websites. We are a small, collaborative team with an immediate need for a colleague with solid front-end development skills, attention to detail and a good design eye. You will be expected to wear multiple hats, conduct thorough testing prior to submitting work for review, and strive to make each client instance a best practice implementation.

What we're Looking For

- Brand, configure and customize instances of Leadfusion SaaS solutions to client specifications.
- Modify websites, micro-sites, landing pages, e-mails templates, and other HTML and CSS based content and forms in support of Leadfusion's business and customers.
- Serve as the technical lead for branding and UI considerations for interactive Web tools, widgets and assets.
- Modify editorial content, designs and layouts of Leadfusion's suite of interactive tools.

Required Skills:

- Intermediate experience with HTML5, CSS
- Working knowledge of client-side JavaScript
- Working knowledge of JavaScript frameworks such as jQuery
- Skilled in the use of browser developer tools and code debugging
- Responsive / Adaptive Web development
- Ability to use Photoshop, Gimp, or similar applications to develop graphic content
- Asynchronous request handling / AJAX
- Motivated to learn new skills
- Ability to effectively discuss website concepts/ideas
- Cross-browser compatibility and development
- Demonstrated understanding of design issues and usability as they impact the UI experience.

Skills:

- AngularJS (a big plus)
- Hands-on experience with version control systems, such as Git (a big plus)
- Experience working with ADA compliance as it pertains to the Web Content Accessibility Guidelines (WCAG)
- Working knowledge of SQL or similar
- Experience working as part of a software development team (collaborating with back-end developers, QA, etc.)
- CSS pre-processing systems (SASS)
- Web development using APIs and Web services
- Previous experience in Wordpress
- Experience in the financial services sector

With our experience building web-based applications for financial customers we offer the stability of a larger organization and the agility of a start-up. If you can see yourself on the Leadfusion team submit your resume for consideration

Apply by sending an email along with your resume to jobs@leadfusion.com.
